NON-US PERSON STATUS DECLARATION

Question	Account Holder 1	Account Holder 2
Is the beneficial owner a US Person?	☐ Yes ☐ No	☐ Yes ☐ No
Was the beneficial owner born in the US?	☐ Yes ☐ No	☐ Yes ☐ No
Is the beneficial owner a Green Card Holder (irrespective of expiry date)?	☐ Yes ☐ No	☐ Yes ☐ No
Irrespective of the Substantial Physical Presence Test, is the beneficial Owner still resident in the US?	☐ Yes ☐ No	☐ Yes ☐ No

CHANGE OF STATUS AS NON-US PERSON

You agree to promptly inform Calyx if your status as a Non-US Person in accordance with the above definitions were to change and you were to become a US Person.

INVESTMENT SERVICES

Please indicate what investment service you want for your account(s), by ticking the relevant box below.

We will manage your account(s) at our complete discretion and will select investments that we deem appropriate for your account(s) given your risk profile and any specific investment restrictions.	☐ Discretionary
You make your own investment decisions and we execute those instructions.	☐ Execution only
This is the currency in which your account(s) will be reported and valued by Calyx.	GBP ☐ USD ☐ EURO ☐ Other

ADDITIONAL SUB-ACCOUNTS

You may need to open more than one account with us. Each additional account will be managed in line with the same investment service, account objective, and risk profile unless you instruct us otherwise. Please provide the relevant information below.

INCOME

For discretionary accounts, the firm has the discretion to reinvest any income obtained through our investment activities, unless you state otherwise.

Do you have any specific income requirements?	☐ Yes ☐ No
If yes, what frequency would you like your withdrawal?	

EXTERNAL ADVISERS

If you have any external advisers (such as financial advisers, accountants, or solicitors) involved in your affairs, please provide their details below.

Adviser 1

Full Name:

Company:

Address:

Telephone:

Email Address:

Would you like the advisor listed above to be authorised to:

Discuss your account with Calyx?

Section 2 Source of Wealth

Please provide information for each individual, and for wealth that has been generated jointly.
Please specify the currency of each entry.

	First Account Holder	Second Account Holder	Joint
Employment			
Inheritance / Gift			
Sale of Buisness			

	First Account Holder	Second Account Holder	Joint
Sale of Property			
Other (Distribution from Trust, Life Insurance, Divorce, Lottery win)			

Section 3 Financial Profile

This section enables us to determine whether the service we provide is suitable for you. The assessment of suitability is carried out to ensure that we act in your best interests.

Please ensure that all information provided is complete, accurate, and up to date. Failure to do so may result in investments being made that are not appropriate for your needs or objectives.

You must notify us promptly if your circumstances change in a way that affects the information supplied below. Calyx may also request periodic confirmation that the information we hold remains current.

If you have any questions regarding this section or the completion of this document, please contact Calyx.

What is the purpose of the portfolio?

To preserve capital

To grow capital

To grow capital to meet future commitments

To generate income to meet current requirements

Section 4

RISK PROFILE

PURPOSE OF THE QUESTIONNAIRE

The rules of the UK Financial Conduct Authority require that Calyx obtains information regarding each of its clients' investment knowledge and experience, financial situation, investment objectives and attitude to risk. The purpose of this section is so that we can ensure that the service we provide you is suitable. The reason for assessing suitability is to enable us to act in your best interests. It is important that you provide accurate and up-to-date information in answering the questions below, as otherwise you risk being placed into investments which are not suitable for you.

If your circumstances change so that the information you have provided us answering the below is no longer accurate, you should inform us as soon as possible. We may also periodically check with you that the information you have provided us is still accurate.

Please be aware that your indicated loss tolerance will help us establish an appropriate portfolio. It is, however, a guideline only and does not offer any protection as far as actual losses are concerned. If you have any questions with respect to this document, please contact Calyx.

INVESTMENT RISKS

For the purposes of this questionnaire and our assessment of your preferences, 'risk' means the extent to which investment returns may fluctuate around the average return. It may also take account other risks such as credit risk and liquidity risk, for example. The level of risk associated with individual investments held within an asset class may be higher than the risk of the asset class overall, due to the benefits of diversification. Similarly, combining asset classes can reduce overall portfolio risk. However, there is no guarantee that historical characteristics and performance will determine how an asset class performs in the future.

Investment risk may take many forms and be influenced by, among other things, the time horizon that you set for the account(s), the need to draw a regular income from your account(s), the potential need to withdraw some or all of your monies at an unexpected moment and inflation.

If you wish to increase the potential real return (i.e., the return on an account(s), taking inflation into consideration), it may be necessary to increase the risk within the account(s). Cash or money market instruments provide little risk in the short term but do not necessarily protect against inflation and your account(s) could fall in value in real terms over the long term if it was significantly weighted towards these instruments. Fixed income securities may have their income and capital value eroded by inflation and the capital value can fluctuate between issue and maturity. Equity securities are more volatile in the short term, but as an asset class, have potentially better long-term prospects for delivering real return. Some investments in equities, property funds, hedge funds and private equity may be less liquid and more difficult to realise than others and it may also be difficult to determine the market price of such instruments.

Currency movements may adversely affect the value of certain overseas assets.

THE EFFECTS OF LEVERAGE

Leveraging a portfolio (i.e. borrowing against the value of your portfolio) can significantly increase the risk profile of a portfolio. The increase in the risk level will depend on the amount of borrowing in comparison to the value of the assets in your portfolio. Other factors such as the liquidity of your investments should also be taken into account as leverage in combination with illiquidity of underlying investments could lead to exacerbation of losses.

RISK QUESTIONNAIRE

(In case of joint accounts, please provide answers considering individual circumstances of all account holders).

1. How many years of investment experience do you have?

Less than 3 years

☐

3 - 5 years

☐

6 - 10 years

☐

More than 10 years

☐

2. What is your investment time horizon?

Less than 3 years

☐

3 - 5 years

☐

6 - 10 years

☐

More than 10 years

☐

3. Which range of annual returns would you find most acceptable for your portfolio?

0% to +5%

☐

-5% to +8%

☐

-10% to +15%

☐

-25% to +30%

☐

4. If the value of your portfolio was to fall by 20% in a 12-month period, how would you react?

I would want to liquidate my investments and hold the proceeds in cash.

☐

I would consider reducing the risk profile of the portfolio.

☐

I would sit tight, expecting the portfolio to recover over time.

☐

I would see this as a long-term buying opportunity.

☐

5. If the portfolio was to fall in value by the end of your time horizon, would this have a material impact on your standard of living or ability to meet commitments?

Significant impact - I rely on the portfolio entirely for income and/or capital.

☐

Moderate impact - Income and/or capital from the portfolio support my current position and a fluctuation would have an impact.

☐

Low impact - Income and/or capital from the portfolio is supplementary and other sources exist to meet regular commitments.

☐

No impact- I have surplus capital and income, and can tolerate significant fluctuations in the portfolio value.

☐

6. What is your view on how readily the investment portfolio can be converted to cash?

I would expect the entire portfolio to be convertible to cash on a daily basis.

☐

I would be comfortable with 15%-20% of the portfolio being less accessible.

☐

I would be comfortable with 30%-40% of the portfolio being less accessible.

☐

I am a long-term investor and have other assets to meet current and future commitments, liquidity of the assets is not a concern for me.

☐

RISK PROFILE SCORING SYSTEM

Calculate the score by adding up points for each question. The results correspond to the following Risk Profiles: Conservative, Balanced, Steady Growth or Equity.

- A = 1
- B = 2
- C = 3
- D = 4

Question 1		Question 4	
Question 2		Question 5	
Question 3		Question 6	
Total			

Your answer will correspond to a Risk Profile; Conservative, Balanced, Steady Growth, or Equity.

Conservative: 6 - 10	☐
Balanced: 11 - 15	☐
Steady Growth: 16 - 20	☐
Equity 21 - 24	☐

INVESTMENT STRATEGY

Based on your answers to the Risk Questionnaire an appropriate investment strategy has been suggested. Do you wish to proceed with the recommended strategy?

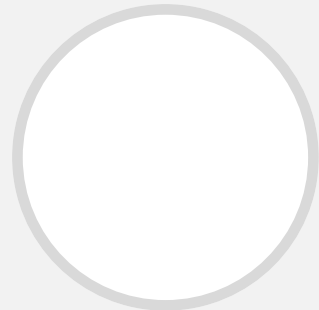

☐ Yes

☐ No

Please select the strategy on the following page.

I would prefer Calyx to classify my risk profile differently, as selected on the following page.

In all cases, Calyx will review your Risk Questionnaire responses and the chosen strategy with you to ensure it is suitable for your circumstances.

Risk Profile	Objective	Characteristics
Conservative 	You place greater importance on preserving your capital and maintaining stability in your annual returns than on pursuing higher potential gains. Your portfolio is focused on income-generating assets, with less emphasis on capital appreciation.	Range of Benchmark Portfolio allocated to Global Equities 0-40% Average Annual Return 5.3% Worst Year (2022) -17.0% Best Year (2003) 20.8%
Balanced 	You are comfortable taking on higher levels of investment risk. This is reflected in a greater allocation to equities and/or higher-risk bonds within your portfolio. You accept that market fluctuations may lead to temporary declines in value and understand that negative annual returns are possible.	Range of Benchmark Portfolio allocated to Global Equities 40-60% Average Annual Return 6.1% Worst Year (2008) -22.5% Best Year (2003) 24.9%
Steady Growth 	You are comfortable with a higher level of investment risk to achieve stronger long-term growth. Your portfolio holds a significant proportion of equities, complemented by income-generating assets to help smooth returns. You accept that your portfolio's value may fluctuate and that periods of negative returns are possible in pursuit of higher long-term performance.	Range of Benchmark Portfolio allocated to Global Equities 60-80% Average Annual Return 6.7% Worst Year (2008) -31.6% Best Year (2003) 29.0%
Equity 	You are focused on achieving long-term capital growth and are willing to accept substantial short-term volatility to pursue higher potential returns. Your portfolio is fully invested in equities, meaning its value may experience significant fluctuations and periods of negative performance. You understand that this approach involves greater risk but offers the potential for superior returns over the long term.	Range of Benchmark Portfolio allocated to Global Equities 80-100% Average Annual Return 7.2% Worst Year (2008) -40.7% Best Year (2003) 33.1%

The table above sets out historical returns and return dispersion over a twenty-five-year period for four indexed portfolios, each comprising a static allocation to global equities and global bonds. These portfolios are generally accepted as representative of the relevant risk profiles.

The asset allocations for each risk profile are as follows: Conservative - 60% bonds and 40% equities; Balanced - 40% bonds and 60% equities; Steady Growth - 20% bonds and 80% equities; and Equity - 100% equities.

The analysis uses historical total returns from the MSCI World Total Return USD Index and the Bloomberg Global Aggregate Total Return USD Bond Index for the period 2001-2025. The figures are provided to give a broad indication of the returns that may be associated with each risk profile. They do not represent a guarantee of future performance, as historical average returns can vary materially depending on the period selected.

NON-STANDARD INVESTMENTS

As part of our investment process we may occasionally use and recommend non-standard investments where we feel they are appropriate and will add value for clients. You should read this section carefully together with the attached Client Terms of Business.

Indicating an interest in certain products does not in itself permit investment investment will only proceed where your risk profile and investment objectives are consistent with the proposed transaction.

Each authorised signatory to the account(s) must indicate whether they are open to using non-standard investments, and then initial each relevant box to confirm that Calyx may discuss these products with you, that you are willing to invest in them, and that you have read the corresponding risk warnings in the Client Terms of Business.

I am open to using non-standard investments.

Account Holder 1.

Yes☐

No☐

Account Holder 2.

Yes☐

No☐

		Account Holder 1	Account Holder 2
Structured product	Customised investments linked to market indices or asset classes (e.g., equities, commodities, currencies). Some offer capital protection, but others may expose you to full market risk. Liquidity can vary.		
Private Equity & Limited Partnerships	Investments in private companies via specialist funds. These may use leverage, have long lock-up periods, and involve complex legal and tax considerations.		
Derivatives & Warrants	Financial instruments whose value is based on an underlying asset (e.g., equities,currencies). They can be used for hedging or speculation. Some may carry the risk of losing more than your initial investment. These products can be complex and are not suitable for all investors.		

		Account Holder 1	Account Holder 2
Enterprise Investment Schemes (EISs)	Direct investments in small, unlisted UK companies with potential tax advantages. These are high-risk and may be illiquid. Tax advice is recommended before investing.		
Venture Capital Trusts (VCTs)	Professionally managed funds that invest in small, unlisted UK companies. VCTs offer tax benefits but may involve longer lock-up periods and higher risk. Please consult your tax advisor before investing.		
Unregulated or Unrecognised Collective Investment Schemes	These funds are not authorised or recognised by the FCA and are not promoted to the general public. They may carry higher risks and limited investor protections.		
Unlisted Property / Real Estate & Limited Partnerships	Investments may include direct property holdings or property-related funds. These can be illiquid and may involve complex structures or derivatives.		
Unlisted Hedge Funds	These funds may use leverage and complex strategies. They can be volatile and are often subject to long lock-up periods and limited transparency.		

Section 5

SIGNATURES

Our agreement with you comprises this document, the Terms of Business, Engagement Letter and any other ancillary documents. You should read the contents of these documents carefully to ensure that you understand them. If you have any questions, please contact Calyx.

You have been classified by us as a retail customer for all transactions, unless we have agreed in writing that you are a professional investor for specific investments.

You agree that Calyx will rely on the information given in this form, and you appoint Calyx to manage your account(s) in accordance with the instructions you have given. You agree to notify Calyx of any significant changes to your circumstances which may affect the management of your account(s).

Calyx will provide you with an engagement letter confirming the details of your account(s) as part on the new client onboarding process.

I/We confirm that I am/we are the beneficial owners of the assets in the account(s).

Section 6

DOCUMENTATION CHECKLIST

IDENTIFICATION INFORMATION FOR INDIVIDUALS

To fulfil our regulatory requirements please provide us with the following documents. All documentation and certification must be in English. All references to “certified” or “certification” require each copy document to be certified as an accurate and true copy of the original document by an independent certifier. Self-certification is not permitted. An independent certifier shall include: a banker (including your relationship manager), notary public, a solicitor, an accountant who belongs to a regulated or professional body, a regulated bank or a regulated financial institution, a government department, an embassy or consulate. Certified copies of original documents (including photographs) must be clear, certified and dated. A certifier must clearly sign, print their names and provide full contact details in the event of a query.

Passport copies for each account holder	☐
One utility bill showing residential address for each account holder, not older than 3 months	☐
